

Description of fields
Voluntary REDD+ Database (VRD) data export
Last updated October 2012

Arrangement ID: Arrangement identification number

Title: Title of arrangement

Description: Brief description of the arrangement. Information can include an overview and purpose of the arrangement, different components of the arrangement, specific activities to be carried out, etc

From/to (years): First and last year that a contribution or disbursement is/will be made

Total contribution amount (millions of USD): Sum of contributions (millions of USD) in the arrangement. A contribution refers to funds that have been committed, allocated or disbursed. It does not distinguish between the different funding phases

Total disbursement amount (millions of USD): Sum of disbursements (millions of USD) in the arrangement. In the context of the Voluntary REDD+ Database, a disbursement is defined as the release of funds by a funder to a recipient

Data quality: Indicates whether contribution values contain estimates

Reporter: Country/institution reporting the arrangement

Reporter role: Indicates whether the reporting country/institution is reporting as a funder of, or recipient to, the arrangement

Funding flow: Indicates whether the reporter is reporting incoming funding for REDD+, outgoing funding for REDD+, domestic funding for REDD+ (REDD+ countries only), internal funding for REDD+ with benefits to REDD+ countries, or funding for REDD+ where the recipient is unspecified

Funder: The country or institution funding the arrangement

Recipient: The country or institution receiving funds in the arrangement

Financing type: The form of financial transaction agreed upon by parties to an arrangement (e.g. grant, loan, purchase of carbon credits, other)

Fast-start finance: For funder countries only: indicates whether the arrangement is considered part of the country's fast-start finance package

Beneficiary countries: Describes the country (or countries) where arrangement activities will take place

Types of actions to be undertaken: the various broad types of action that may be undertaken in a given arrangement. The possible actions are: REDD+ strategy and other policy preparations; Reference scenario development; Stakeholder consultations and engagement; Demonstration activities; Sectoral transformation (agriculture, forestry, finance); Monitoring system (Measuring, Reporting and Verification); Monitoring and evaluation (arrangement or programme); Multiple benefits (social and environmental); Governance; Capacity building and local awareness; Performance-based payments for emissions reduction; Research; Other

Additional notes: Any additional details related to the arrangement that are worth mentioning (e.g. method of calculating contributions between years, additional parties involved and their roles [implementer, co-funder, etc])

Last update: Date arrangement was last updated by reporting party and published to the database website
